Press Release

BedRock Announces: AggFlow version 5.0 with “Wash Calculations”

BedRock Software, Inc. (BedRock) announces the release of AggFlow version 5.0 with “Wash Calculations”. Version 5.0 provides the first ever complete wash calculation capabilities in the industry. “This is a significant development for AggFlow users who employ water in their aggregate operations” said Bryan Lewis, President of BedRock Software, Inc. “We have worked long and hard to design and develop this capability specifically for, and at the request of, our customers”.

The new wash calculation capability is part of a complete program upgrade that includes an expanded equipment list and new, faster calculation capabilities. AggFlow is used by aggregate producers, equipment manufacturers and dealers across the globe to reduce calculation time and increase productivity in aggregate and mining operations. Visit the AggFlow website for more detailed information at: www.aggflow.com

BedRock Software, Inc. has been providing the AggFlow program to the aggregate industry since 1993. BedRock is an independent, privately held company.
